Monola ticks all the boxes

'Our Monola yield and oil was as good as any nearby canola crops, but the best thing is the Monola premium, which is such an added bonus.'

David Ellis
Burrumbeet Vic

Why grow Monola?

Monola now offers you the full package, with a premium bonus. Triazine Tolerant varieties that perform with the best!

2008 NVT trials demonstrate Monola 76TT and 77TT have it all when it comes to....

- **Improved yields over industry standard varieties.**
- **Higher oil content.**
- **Secure market options.**
- **Monola Premium Payments.**

Monola gives you the full package, ensuring higher gross margins.

If you're in the Profit Zone, why aren't you growing Monola?

Cropnetwork's Travis Rankin with Rob Lawrance (right).

'We like growing Monola as part of our farming mix as we feel it provides a product demanded specifically by consumers. Furthermore, the new TT varieties have done very well in our area.'

Rob & Georgie Lawrance
Gatum Vic

How Nuseed Cropnetwork supports you in maximising your gross margins

- **Yield monitoring crop inspections**
- **Flexible base price lock in dates**
- **Your grain is strategically marketed to maximise crop value**
- **You receive a Monola premium payment**

With Nuseed Cropnetwork, you gain access to a range of high performance, High Oleic specialty canola oilseeds, including Australia's only herbicide (triazine) tolerant varieties. Premium quality seed is available under contract from local Monola seed distributors.

Yield potential is carefully monitored, with crop inspections held during the growing season. Base price lock-in dates are flexible and you will receive your Monola premium in a separate lump sum payment. Cropnetwork Monola grain is strategically marketed to end use oil customers to maximise crop value.

Go for a healthy profit...

Naturally polyunsaturated Monola™ oil provides a healthy alternative to cooking oils containing high levels of saturated and trans fats.

And with their premium over canola, Nuseed 77TT and 76TT Monola varieties deliver an even healthier bottom line.

Nuseed CanolaCote™ complete and convenient crop protection...

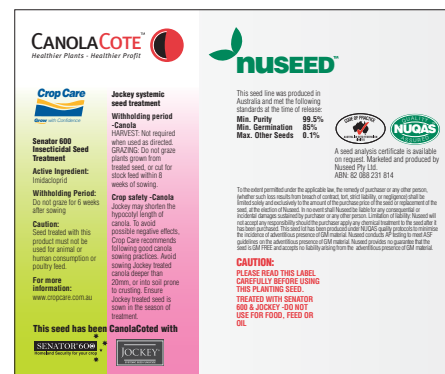

- Increased protection against targeted insects and pathogens.
- Custom made to your specifications, subject to regulations.
- Professionally applied.

Crop Care Jockey®

Jockey® has proven to be effective in minimising the effects of Blackleg infestation and maximising yield. Field trials have proven that Jockey® is a cost effective means of disease control especially in paddocks with moderate to high disease levels. Early protection against Blackleg helps to maximise healthy plant establishment and reduce lodging due to stem cankers, leading to higher yields.

Senator® 600

Based on the proven active imidacloprid, Senator® 600 is a new insecticidal seed treatment from Crop Care. Senator® 600 is an easy and effective way to give your crop early protection from Red Legged Earth Mite, Blue Oat Mite and Aphids. In areas of high mite pressure Crop Care would recommend using Senator® 600 in conjunction with Talstar 100EC as a bare earth spray to maximise healthy plant establishment.
