

**Ausi-gold 61** - This mono-unsaturated hybrid offers a complete package with high grain and oil yield, featuring a compact plant height and rust resistance coupled with drought and stress tolerance. The high percentage of high oleic fatty acids makes this grain highly suitable for the crushing market. Ausi-gold 61 has shown outstanding results across a wide range of commercial plantings, and can be sown in all current production areas, especially where the market requires a high oleic hybrid.
