

WHEAT
AH

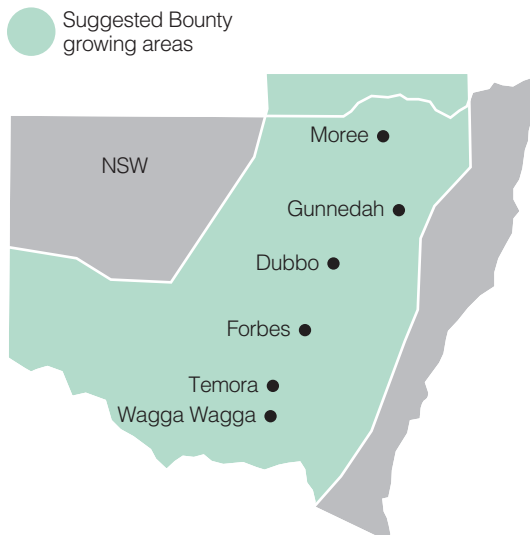

EGA Bounty

A high yielding mid maturity wheat with an excellent disease package, EGA Bounty is very well suited to both dryland and irrigated sowings throughout NSW.

Maturity: Intermediate. Similar to that of Baxter, Cunningham and Ellison.

Yield: EGA Bounty has shown very good yield potential over commonly grown, commercially available wheats throughout all of NSW. Refer to the graphs for NVT long term yield reports.

Disease: Has an outstanding combination of resistance to Stem, Stripe and Leaf Rusts as well as good tolerance to root lesion nematodes. EGA Bounty also provides very acceptable resistance to yellow-spot. It may be vulnerable to black point in conditions that suit this disease.

Agronomic Data EGA Bounty

MATURITY	Early/Mid
CLASSIFICATION	AH
STEM RUST	MR
STRIPE RUST	MR*
LEAF RUST	R-MR
YELLOW SPOT	MS
CROWN ROT	MS-S
STRAW STRENGTH	MR
YIELD	High - refer to data

*Stripe rust reaction to both the Jackie and WA Yr17 pathotypes

PBR/EPR: EGA Bounty is covered by Plant Breeders Rights and is subject to an End Point Royalty of \$3.00 per Tonne (GST Exclusive).

Bred by: Enterprise Grains Australia, a joint venture of NSW DPI, QDPI & F and GRDC.
